

A house in the Dowsett Tract, in a few years, will be in the heart of the choicest residential district in Oahu. Note the character of the neighborhood.

## Good Roads in the DOWSETT Tract is an accomplished fact,--- and they are already *PAID FOR!*

That means you will not be assessed for street paving, curbs or sidewalks, and yet will have the best system of streets in Honolulu. It will not be necessary to tear up any pavement to install gas or water pipes. These are already brought to every lot in the Dowsett Tract.

The streets of the Dowsett Tract are probably the best that have so far been built anywhere in the Territory.

They have been built to last, of six inch concrete, surfaced with asphalt to deaden the sound and take away the glare.

Notwithstanding the many uniquely desirable features of the Dowsett Tract, the lots are lower in price than the established market price of surrounding properties. .17c per square foot buys any lot.

**The sale of lots is progressing rapidly. It is essential that you choose your lot without delay.**
